ABOUT BIODANZA;

Biodanza was created/received by Rolando Toro back in the 60's with the desire to transform Humanity back to our original state as Love, to Be the dance of Love in action as our lives expressed. Biodanza now exists all over the world inviting people back into their bodies, their feelings, their health and well Being, their creativity, pleasure and contact.

It is a simple guided process of dance movement expression which brings you into an enlivening contact with yourself, others, and the wider Human community accompanied by beautiful music from around the world.

Guy will facilitate these 2 Biodanza sessions to invite you to dance your Hearts out into the open, so your inner Presence is awoken and revealed. As we live, move and create from this space of natural authenticity and Love, so our vision is renewed, our relationships enriched, our world transformed...

Guy has been teaching Biodanza internationally for the last 15 years. He has a background in Shamanism, Healing, Conscious Relating & Parenting, Tantra & Creative process which he weaves through his Work. You can contact him at colibriheartshaman@yahoo.com or fb "Guyde Books"
